

PT-11 Nesting Dinghy Pre-Order Offer

6th Nov 2023

Thank you to everyone who has expressed an interest in the PT-11 design as a kit. We appreciate this has been a slow process.

Fyne Boat Kits have exclusive rights to manufacture and sell the PT-11 and Spear designs in the UK and European Economic Area. We have gone through the kit parts in detail and found suppliers either here in the UK or in Europe ensuring we have stuck to the precise materials and / or design and shape (as nothing in this boat is there by accident! It is there as part of a 4 to 5 year refinement process by Ashlyn and Russell Brown.) Any minor tweaks have been ratified by Ashlyn and Russell. The upshot is there are fairly hefty minimum orders for lots of these parts which require significant investment. We are happy to do this but need to know we can sell the boat. Within this context the boat is relatively expensive and as yet unknown how it will sell in the UK and European market. So, we are seeking a commitment from prospective owners to show they are serious about a purchase. If we get enough interest then we will procure all the parts and continue bringing the boat to market as quickly as we can. If we do not get enough interest we will return the commitments without quibble as soon as that decision has been made.

We propose serious parties place a non-returnable deposit of £1,500. Our target is 20. Once we reach this the project is viable. In return for your trust and confidence Fyne Boat Kits will agree to supply you a base kit at this years price for £4,275 plus delivery (minus your deposit). This is very likely to be higher once in normal production. As a 'Thank you' we will give you a one time (one chance) offer on the sailing upgrade and other accessories and extras at list price minus a discount. The discount varies depending on when you pre-order; the first 10 people get 20% discount; 11 to 20 get 15%; after this it is 10%. We will confirm your discount qualification upon paying the deposit. This ensures you get a kit as quickly as possible and at significant discount.

The kit options will be as follows:

- PT 11 Nesting Dinghy Base Kit
- PT 11 Nesting Dinghy Sailing Kit
- PT 11 Rudder and Daggerboard Kit
- PT 11 Bumper kit
- PT 11 Foils Carry Case
- PT 11 Gaco Oarlocks
- PT 11 Footbrace Kit
- PT 11 Oarlock Riser Kit

If we fall short of the target and decide to not proceed we will return deposits immediately. Nothing lost on your part.

Questions:

Why not just import from USA? Shipping prices make this unrealistic. To make this possible the boat and it's parts need to be made this side of the Atlantic.

How long will this take? We are hoping we will reach the target quickly as the boat is held in high regard. Once there we will build a boat verifying the parts and once verified we will feel happy releasing the kits. So, from target reached this could take 6 to 9 months.
